

Sandra Goldie

After a career as an interior designer, Goldie pursued her dream of painting by completing a BFA graduating with distinction from Concordia University. Concurrently with completing her degree, she started up a gallery for emerging artists in Montreal, which she successfully grew for nearly a decade. During this time, the gallery participated in numerous art fairs, including Art Toronto. This second career as a gallerist followed her to the County and Oeno Gallery, where she continued to work with exceptional artists, both emerging and established.

A decision to pursue a more personal career has put Goldie back in the studio. Her accumulated experiences from both the design world and the art world now influence her painting
